# BRAND STORY

Dear Friends,

Imagine yourself at North Pole, a mother polar bear with her baby enjoy the sunshine and showed up on an icy hill. That vivid image inspires our founders to create the BEARACK brand, the premium brand in car racks. The soft touch yet the mighty polar bear transforms into our rack carrying your favorite gears. The sole mission of our brand is to create a safe and user friendly product moving along with your active lifestyle. Whether it is cycling, canoeing, kayaking, camping, or even boating. BEARACK is always here to stand by every second of your adventure.

With forty years in manufacturing and designing car racks, BEARACK has made premium racks helping people around the globe to engage with their favorite sports. Every day we strive in providing racks that are harmless to our mother earth yet fulfill the needs of your active lifestyle.

Together we can escalate our experience in outdoor life and protect our living habitat. On behalf of BEARACK, we are grateful for your participation in our lifelong mission. Thank you!

# EXTREME TESTING BOTH IN LAB AND REAL WORLD

The excellent quality of BEARACK is achieved with simulated CAE analysis, series of environmental tests and on-road tests under extreme conditions.

These tests are guided by international safety standards (XP R18-904-4:2008 and ISO/ 11154:2008), the highest rack standards in the world and all recognized by automotive industry.

**1. Universal Tensile Test:**  
Rubber straps are tested by pulling & breaking test.

**2. Universal Tensile Test:**  
Textile straps with hooks are tested by pulling & breaking test.

**3. Breaking Test:**  
Racks are tested up to four times of loading weight (250 kgs) at six directions.

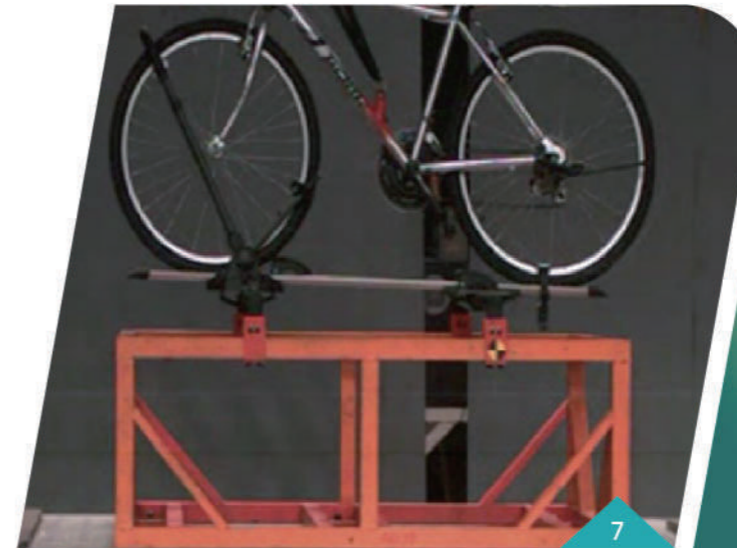

**4. Resistance of Corrosion Test:**  
Components are submitted to anti-corrosion test for 192 hrs at salt spray chamber.

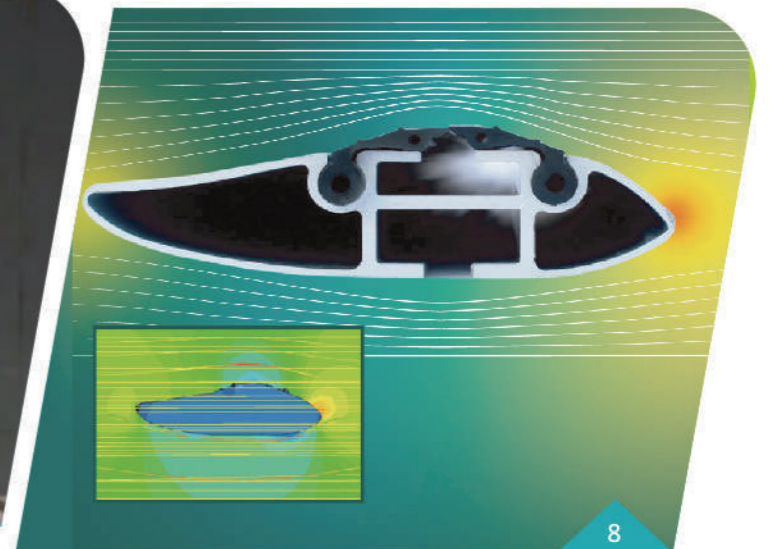

**5. Sleeping Policeman Test:**  
Racks pass ramp test which means three times of high speed driving test over a ramp.

**6. Belgium Blocks Test:**  
Racks pass rough road test which means 6 km of driving over bumpy road.

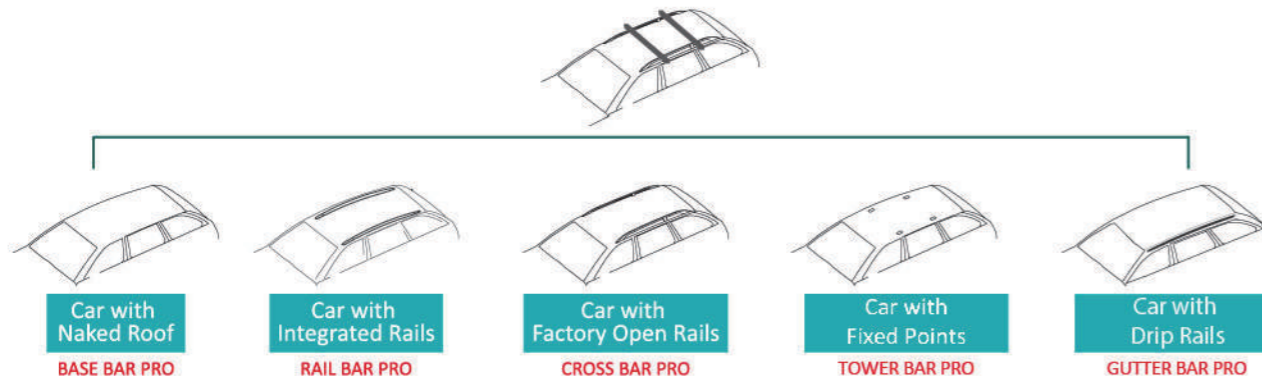

**7. City Crash Test:**  
Roof racks are submitted to car accident simulation test to ensure safety.

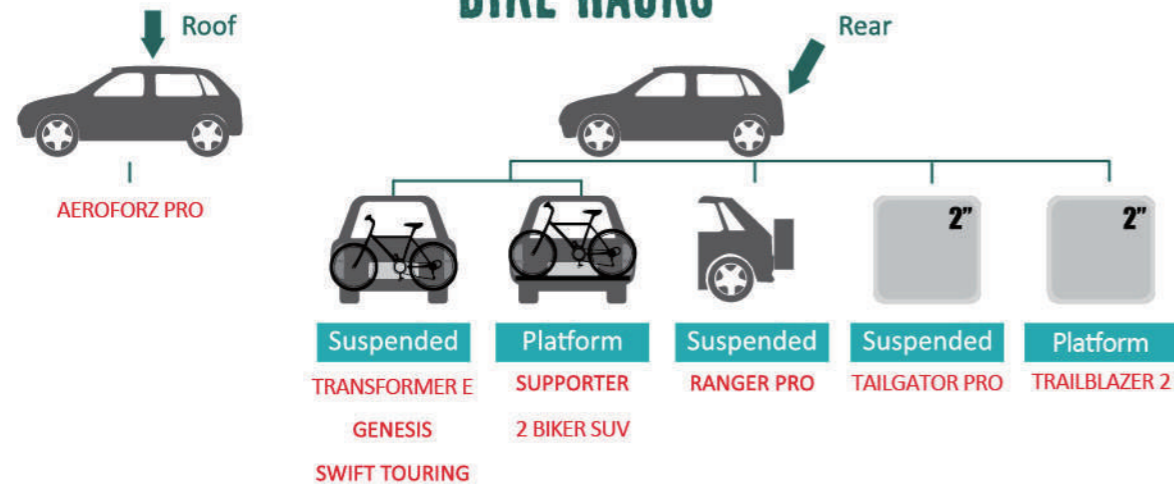

**8. CAE (Computer-Aided Engineering) Analysis:**  
Products are validated by computer simulation program. This process is used greatly in product optimization.
